For **90 years**, we've built our legacy on creating moments of **beauty** where they're least expected.

CELEBRATING 90 YEARS

We've forged a reputation as **pioneers** in the cabinet hardware industry, **meticulously** designing products that inspire homeowners to express their personal style. Our **experience** allows us to anticipate solutions, **thoughtfully** considering every detail and going to extraordinary lengths to deliver **excellence**.

We carefully cultivate every collection, so you can achieve effortless style.

For us, thoughtful product design isn't just a goal — **it's an obsession**. Our designers are constantly scouring home décor conferences, always considering industry trends and looking for new ways to help our customers tie together their desired looks. Our **top collections and on-trend finishes** are designed to make finding your space's perfect finishing touch as easy as it is enjoyable.

Looking to elevate your style? Look no further than our **Best of Amerock Collections.**

Our most popular collections represent a breadth of **on-trend** home décor styles, from farmhouse chic to industrial modern. Whether you're looking to add a touch of drama to your kitchen with Westerly™ pulls in Black Bronze or a bit of glamour to your master bath with Glacio knobs in Golden Champagne, we have the **perfect finishing touch** to tie together any room.

GLACIO

Glacio is sleek and minimalist, blending crystal-clear accents and beautifully finished metallic mountings that seem to float above the surface for an ethereal look and feel.

AVAILABLE SIZES

Knobs

- 1-3/8in (35mm) LGTH (Round)
- 1-3/4in (44mm) DIA (Square)
- 1-3/4in (44mm) LGTH (Oval)

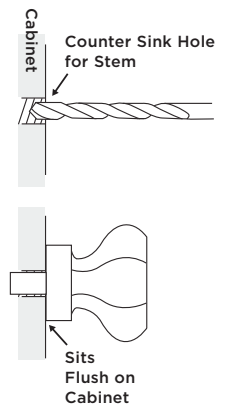

Pulls

- 3-3/4in (96mm) CTC
- 5-1/16in (128mm) CTC
- 6-5/16in (160mm) CTC

See index for product numbers and dimensions for ordering.

How to install our Glacio knobs that have a "stem."

The stem on the back of the knob must be countersunk so that the knob lies flush with the cabinet surface. For full details on how to drill holes and mount hardware, see Amerock.com for Glacio installation instructions. Due to varying cabinet thickness, you may need to purchase longer screws.

MIX & MATCH

The Glacio collection is a striking complement to our Bar Pulls for an upscale appearance.

pg 16

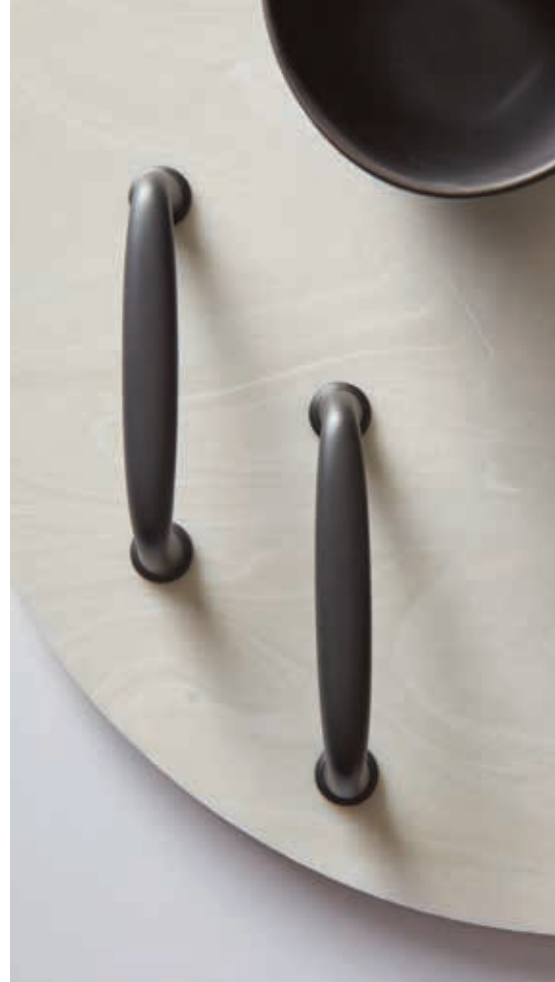

INSPIRATIONAL

From the very first design sketch to the final finishing touch, we believe every space should be uniquely inspired.

Inspiration is more than a feeling — it's a process. Our designers draw inspiration from cutting-edge industry trends and fashions, always looking for new ways to incorporate fresh style into their collections. Our **Black Bronze** finish was inspired by the matte black trend in home décor and is now available across all of our most popular collections.

For a stunning combination, pair our Bar Pulls with a solid cast or acrylic Oberon knob.

pg 56

Our **Oil-Rubbed Bronze** finish is designed to give our products a warm, slightly aged look.

Beautiful design starts with meticulous attention to detail, always going to extraordinary lengths to deliver excellence.

METICULOUS

From the drawing board to the final measurements, we take pride in making sure every step of our process gets the attention it deserves. We are extremely meticulous about the brushing process for our **Oil-Rubbed Bronze** finish, making sure the subtle copper highlights perfectly accentuate every rounded edge and curve.

MIX & MATCH

For a finished look, dress up your Mulholland™ cabinet hardware with our coordinating Mulholland™ wall plates.

With soft, cool undertones, **Golden Champagne** is a refreshing take on a traditional finish.

With years of pioneering experience in the cabinet hardware industry, Amerock has built its legacy on staying ahead of the curve.

PIONEERING

As the first decorative hardware company in the industry, Amerock has a legacy of pioneering new solutions and staying ahead of the curve. Amerock was the first company to design matching hardware, allowing customers to coordinate cabinet hinges with their hardware. Amerock was also the first cabinet hardware company to develop **Golden Champagne**, an enriched gold finish inspired by the resurgence of gold in home décor.

EXPERIENCED

With 90 years of experience, Amerock knows the industry inside and out, anticipating solutions to problems before they ever arise.

Since 1928, Amerock has built its legacy on creating moments of beauty where they're least expected. Our experience allows us to look ahead and consider new trends, while still designing products with staying power.

Like us, **Satin Nickel** never goes out of style, which is why we've made it available across almost every collection in our product suite.

Our **Polished Nickel** finish provides a bit of shine and sparkle, elevating the everyday.

THOUGHTFUL

The right product starts with thoughtful design, always carefully crafted to leave a lasting impression.

At Amerock, we know style isn't created in a vacuum. Our products are designed to coordinate well with every element of your home, from plumbing fixtures to kitchen appliances and everything in between. As understated glam became a more popular style in home décor, we thoughtfully expanded the availability of **Polished Nickel** across our collections for its ability to infuse glamour into the everyday and complement on-trend looks.

Commonly Asked Questions

We've prepared a list of Commonly Asked Questions to make your selection process even easier.

Additional product information can be found at Amerock.com/Support/Customer-Support

What materials are used in Cabinet Hardware?

The base or primary material used in our products is die cast zinc with either an electroplated or painted finish covered with a clear protective coating. Other metals (brass, aluminum, steel) and materials such as plastic, glass, ceramic and porcelain are also base materials used in our products. For information on base material content for a specific product, please visit our website.

What is electroplating?

Electroplating is a process by which a metal finish is adhered to another conductive surface through the use of electric current. We have over 42 finishes in silver, gold and brown tones applied using this process.

Does your product contain nickel?

Our metal products are covered with a transparent protective coating and nickel is not a primary or base material in our products. However, nickel can be found in some of our electroplated finishes and could be used in combination with other base materials we utilize.

Do finishes match throughout all products?

Yes, our finishes will be consistent across different product types in our product assortment and collections.

What is Amerock's Guardian® Lifetime Guarantee?

The Guardian Lifetime Guarantee represents the highest quality standards on select Amerock decorative hardware styles. For additional information on the Amerock Guardian Lifetime Guarantee, please visit the warranty section of our website.

I cannot find pulls to fit my hole pattern. What should I do?

If your current hole pattern is smaller than your new pull size, use a backplate. The backplate will cover the old holes. If your current hole pattern is larger than your new pull size, then you can either use a backplate or one of our decorative pulls with a larger footprint that will cover the old holes.

What size appliance hardware do you carry?

Amerock offers appliance pulls sized 8in, 12in and 18in – measured center-to-center. These are oversized pulls that can be used, not only on appliances, but also on cabinet doors and drawers to create an on-trend look.

Do you offer coordinating hinges for Amerock knobs and pulls?

We offer a wide variety of hinges to match our knobs and pulls. Please keep in mind that not all of the hinges are available in all finishes and styles. To find out if a certain piece of our hardware is available in a specific finish, please call **Customer Service** at **1-800-435-6959**.

Will my finish tarnish?

Our metal finishes will not corrode if cared for properly. However, both our metal and painted products could tarnish if the finish has been deeply scratched or cleaned with an abrasive cleaner.

How can I clean your product?

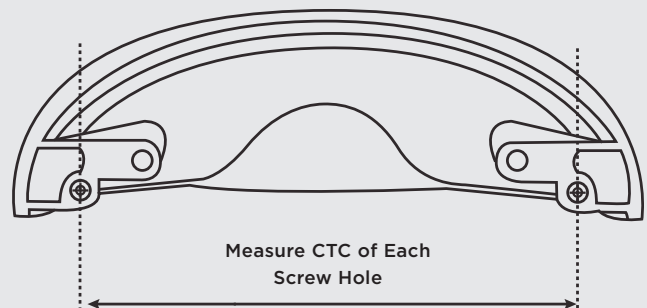

When necessary, all Amerock hardware is best cleaned using a soft cloth with warm water and mild soap. Abrasive cleaners will cause damage.

Can I use your products outside?

We don't recommend our products for outside use. They are rated for indoor use only.

What is center-to-center (CTC), and how do you measure CTC?

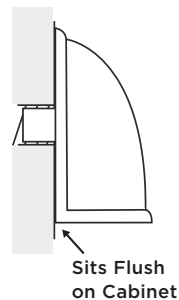

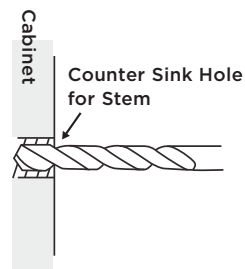

When you are installing or replacing a pull, it's important to measure center-to-center. This is the installation measurement for the distance between the two screw holes. Try to measure from the center of each hole. Amerock offers a template that you can purchase to assist in measuring from 3in (76mm) to 5-1/16in (128mm).

How do you install items with a “stem”?

Do they sit flush on a cabinet? (i.e., Cup Pulls, Glacio knobs)

The stem on the back of the product must be countersunk so that it lies flush with the cabinet surface. For full details on how to drill holes and mount hardware, see Amerock.com for installation instructions. Due to varying cabinet thickness, you may need to purchase longer screws.

*Launching later in 2018. Contact Amerock Customer Service for availability. | †Check inventory levels before ordering.

**For the Bar Pulls Collection, appliance pulls have a diameter of 3/4in(19mm) while the knob and the other pulls have a 1/2in(13mm) diameter.

The dimensional information provided here should be verified with the actual product prior to drilling or attempting to install the hardware.

Please direct any questions you may have on the installation process to Amerock Customer Service.

^{††}For the Bar Pulls Collection, appliance pulls have a diameter of 3/4in(19mm) while the knob and the other pulls have a 1/2in(13mm) diameter.
 The dimensional information provided here should be verified with the actual product prior to drilling or attempting to install the hardware.
 Please direct any questions you may have on the installation process to Amerock Customer Service.
