SANDING DISCS

All UNEEDA's discs are available with PSA, hook & loop or plain backing. They can be manufactured without holes or with a variety of vented hole patterns to match any brand of sanders on the market today. Depending on your requirements our PSA discs are available as individual square tab discs, on roll with liner or as link rolls.

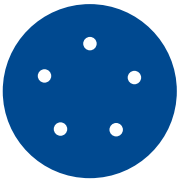

All of Uneeda discs come in quantities of 100 per box for grit 80 or higher, and 50 per box for grits 60 or lower.

NET STRUCTURE DISCS

EKANET offers a unique net pattern designed to improve sanding performance for a cleaner and smoother surface. EKANET is particularly well suited for sanding fiberglass, metal or dry walls where maximum dust extraction is needed. Moreover, Uneda offers the most competitive prices for net style abrasives in the industry today.

If you are looking for a cost efficient alternative to other net products on the market today then look no further than our new EKANET discs and sheets. Our discs will fit any types of 5" or 6" hook and loop sanders, such as Bosch, Makita, Dewalt, Ryobi or many other brands.

EKANET discs are sold in quantities of 50 per box.

UNEELON DISCS

Uneelon is a non-woven product used in scuffing applications and to abrade paint to give it a different look. They are designed with the grain evenly distributed throughout the pad, not just on the surface, which provide a much longer lifetime. The hook & loop backing allows the disc pad to easily attach to your sander.

Uneelon discs and sheets are sold in quantities of 20 per box.

HOOK & LOOP (UNELEVEL) SHEETS

MAXIMUM DUST EXTRACTION.
GREAT CUTTING SPEED.
LOWER PRICES THAN COMPETITION

If you are looking for a cost efficient alternative to other net products on the market today, then look no further than our **EKANET** sanding sheets.

EKANET offers a unique net pattern designed to improve sanding performance for a smoother finish and dust-free environment, and its mesh-like structure reduces friction for a cooler sanding experience.

Since dust is quickly extracted and the surface is sanded with the grain only, **EKANET** delivers a higher removal rate for a uniform and superior finish. Ideal for soft and hardwoods, particle board, acrylic and polyester lacquers, solid surface, and fiberglass.

GRAPHITE

Uneda graphite cloth rolls are a specialized material used in woodworking, particularly in sanding operations. These rolls are made from a heavy, canvas-backed cloth coated with graphite and is applied to the platen of a belt sander. The primary benefit of using graphite cloth is its ability to reduce friction and heat buildup during sanding, which helps to extend the life of sanding belts and improve the efficiency of the sanding process. By providing a slippery surface, graphite cloth decreases the drag on the sander's motor and bearings, allowing for smoother and more consistent sanding results. This makes it an essential tool for achieving high-quality finishes in woodworking projects.

FELT

F1 Pressed felt is a high-quality material commonly used on platens in the woodworking industry, particularly on wide belt sanders. Uneda offers F1 pressed felt in 1/8", 1/4", and 1/2" thicknesses. Felt is known for having high vibration absorption and helps in achieving a smooth, chatter free sanded surface. The felt is typically attached to the platen using contact cement. Felt aids in reducing friction and heat buildup during sanding operations making it an essential component when using a platen to sand.

EKASILK PLUS

Say goodbye to hand sanding for your finishing operation

UP TO
30X
MORE DURABLE

EKASILK PLUS is the answer to the most common finish sanding problems. Coming in an array of sizes, grades and thicknesses to cover all the bases, the EKASILK system will speed up your finishing, by eliminating hand sanding and giving you back your time, energy and money, all while delivering the best finish possible.

- **Outlasts conventional abrasives by up to 30 times**
- **Eliminates the use of hand sanding**
- **Adapts to any contours and profiles**
- **Consistent cut and finish throughout**
- **Available in vented holes to maximize dust extraction**

PAD SAVERS

Our pad savers come in a variety of sizes and can increase the life of your hook and loop sander backing pads. The thin pad attaches between the sander's hook & loop backing pad and the abrasive, helping to protect the pad from the normal wear and tear that is unavoidable in sanding applications.

Simply, replace the EKASAND Pad Saver and not the backing pad at a fraction of the cost.

DUST EXTRACTORS

Our EKASAND SERIES 2 are the most versatile professional grade dust extractors on the market today. Our shop vacuums allow you to plug in an electric or pneumatic sander, or both at the same time. The AutoSync feature automatically triggers tool on and off when the sander is turned on and then off. Our dust extractors also have a HEPA filter that removes 99.7% particles. Optimize your sanding operation with Uneeda's new generation EKASAND Series 2 dust extraction system.

- **Allows dual electric and pneumatic hook-ups**
- **AutoSync automatically triggers tool with on/off function**
- **HEPA filter removes 99.97% particles**
- **Optional unique rack system available for easy tool storage**
- **Adjustable suction power from 2,000 to 10,000 rpm**
- **Lighter than other professional dust extractors**
